

SpiderMount Monitor Mount

Deluxe LED Lights

Bubble Panels

Table Top

# EXPO Evolution™

An ExpoDisplays Product

## Evolution™ is a powerful combination of flexibility, durability and simplicity.

Evolution's features set it apart in the industry as the premier pop up display.

**Easy Setup:** The lightweight frame expands into shape without any tools required. Graphics attach with magnets with ease. Truly a one person setup process in minutes.

**SpiderMount Accessible:** Evolution is one of only two pop-up displays to accommodate the amazing SpiderMount 22" LCD Flush Mount Monitor System.

**QuickSet™ Light System:** Lights come assembled as part of the frame. No ladder need to install.

**Custom engineered end caps:** Evolution's end caps are designed to be secure; our curved endcaps stay in place and lined up once attached.

**Multiple lighting options** including LED lighting upgrade that reduces energy output by 94%.

**Large image area** maximizes booth exposure in either flat or curved wall configurations.

**Table Top Conversion:** A 10' Evolution display can be converted to a table top display using the same frame! Instead of purchasing two displays, you simply purchase a conversion kit.

**Lifetime Warranty:** We provide you with a lifetime warranty on the frame of the Evolution.
