

How do graphics attach?

Simply apply vinyl or computer generated graphics to the front of the plexi.

How are headers packed?

All headers come in a SC12 header box except the H9014B, which comes in its own box.

Do headers include lights?

No.

Are custom-sized headers available? How do I price them?

Yes. Simply calculate the total square inches of the size you want and use the price of the header with the next higher square inches. For example, a 50" long by 10" tall header (H5010B) would be 500 square inches, so it will cost the same as the H4214B header (588 square inches.)

VI Lighting

What back-lighting options are available?

The LF23 is a 22" wide light bar with three 100-watt incandescent bulbs. We recommend using one LF23 per panel section. For example, a PS4 has two panels along the back, so use two LF23s. Other options include the LF20 and LF21 Pretzel lights, and the LF27 fluorescent light.

What spot and flood lighting options are available?

For premium lighting, use the LF69 200-watt halogen flood. The SC80 Crescent light adds a nice design element to your display. For economical lighting, use the LF33, a 100-watt incandescent light.

VII Counter Tops

How are counter tops constructed?

Laminated 3/4" birch plywood.

Is there a standard color laminate?

All tops are black unless otherwise specified.

Inlaid Logos in Countertops?

You may add custom inlaid logos to countertops. Call Customer Service for more information.

Are other laminates available?

Yes. Call for a quote on custom laminates. We will use any laminate that you specify, provided we can get it. Obviously, the turnaround time for custom colors or laminates could be longer.

How do the counter tops attach to the panel sections?

With splines that are similar to the panel stacking splines. Half of the spline inserts into the panel edge, the other half inserts into a groove on the bottom of the counter top to hold the top in place.

VIII Fabric Colors & Patterns

What types of fabrics are offered?

Our standard fabrics are Premier, Regal, FrontRunner, and Prelude. Other fabrics may be ordered —call for availability and price.

What types of stripe patterns are available?

Horizontal stripes of any height are available on all components. Call for quote on vertical stripe patterns and custom fabric in-lays.

What limitations apply when choosing stripe patterns?

Very few. Please note that putting a stripe on both sides of a panel section (both sides of a podium, for example) is more expensive than two individual stripes, due to the construction methods.

Can I mix fabric patterns?

Yes. You can choose a different fabric for each side, and even use different fabrics on the same side. For example, you can have Front Runner with a Regal stripe on the front, with Prelude on the back.

Are there any limitations when choosing fabrics?

Polar Front Runner is available only in stripes under 10" in length (see Front Runner Swatch Card.) Prelude and Velvet Loop Tempo fabrics are not recommended for any curved ExpoAire structure (the PCEC end caps, for example).

How do I specify fabric colors when ordering?

For simple patterns (one front, one back) simply include the fabric colors on the Order Form. When ordering stripes, please use the Stripe Order Form.

IX Cases & Boxes

How are systems shipped?

Unless cases are ordered, systems will be shipped in cardboard boxes. We highly recommend cases to protect the display.

What shipping and carrying cases are available?

The SC50, SC51, and SC52 wheeled cases, the SC60 wheeled tub, the SC30 carrying bag, and the SC10, and SC22 shipping boxes. Refer to the Design Guide for a complete listing of cases and their dimensions.

How many panels will fit in a SC50 case?

The SC50 is a telescoping case, with inside dimensions of 48" x 25" x 7 1/2", and outside dimensions of 52" x 27 1/4" x 10." It will hold six ExpoAire panels non-telescoped, and eight if telescoped.

How many panels will fit in a SC30 carrying bag?

The SC30 is made of a heavy canvas fabric with handles and a removable shoulder strap. We recommend a maximum of 8 panels.
