

**FABRIC COLOR MATCHING**

*When creating graphics you may need to know close PMS color matches for the fabric used on the displays. A list of common fabric brands and their matching colors can be found below. Due to variations in fabric lots, there is no guarantee that these are exact matches, only close equivalents. You can find the actual samples of these fabrics in this binder under the "Fabrics" tab.*

**Front Runner:**

Cloud	Cool Grey 7C	Cornflower	294U
Silver	429U/430U	Windsor	280C
Stone	Cool Grey 9C	Imperial	281C/282C
Koala	424C/425C	Panama	3955C/2965C
Apollo	123C/124C	Midnight	2767C
Gold Dust	131U	Clover	5463C
Straw	139U	Savannah	323C
Rust	181C	Celery	577C
Blaze	187C	Meadow	5615C

Cobalt	2767C
Aegean	294U
Royal	281C/282C
Gump	5463C
Forest	3435C
Stellar	2765C
Eclipse	Black 6C 2X

**FTP SITE**

The ExpoDisplays FTP site allows clients to exchange large files by directly accessing a portion of our mail server. The FTP site works in a similar way as downloading files off the internet. The Graphics Department prefers to receive files on disk or e-mail whenever possible, but the FTP site can be used for tight deadlines. The client must own and be proficient in FTP software.

*Here are some of the uses/benefits of using the FTP site:*

- *Immediate file transfers* - Needed files can be uploaded/downloaded directly to/from our company server. Great for files that need to be rushed to the proper department.
- *Speed* - Faster transfers than via e-mail, and definitely better than snail mail.
- *Large file transfers* - Eliminates long email download times, size rejection by internet service provider, or the delay often experienced when using some of the larger internet providers.
- *Email address not required* - User only needs FTP software and FTP site information to log on our server.

Scenario: Client wishes to upload a file to our FTP server (for example, client needs to rush artwork to the proper department)

1. Provide the client with the following information:

Path: www.expodisplays.com

User: graphics

Password: expodisplays

(This information tells the client address and log-on information to gain access to our FTP site.)

Some Macintosh operating systems may require the use of a separate FTP software. In such cases please enter the following information:

Path: host:www.expodisplays.com

User: graphics

Password: expodisplays

(This information tells the client address and log-on information to gain access to our FTP site.)

2. Once the file is completely uploaded, e-mail Delaine Green at Delaine@ExpoDisplays.com with the following information: Job Name, Dealer/Account Executive Name, Job Number, and File Name on the FTP site. She will then log on the FTP site and transfer the files to the Graphics Department, or any other department you specify.

3. If you have any technical problems or questions concerning the FTP site, please contact ExpoDisplays' IT Department at 205-439-8255
